

12/14/15

Communications: To the City Council from Peter Valentine 37 Brookline St. regarding The Peoples' need for calming beverages being equal to the City Councils'.

Since there would be no government without The People, The Peoples' basic health needs while in the council chamber are as important as the Councils'.

The People do not come to the council meetings for entertainment. They come to listen, to think on matters affecting their lives and to express their needs, thoughts and requests. Having liquids to help them relax and compose their thoughts is as important as it is the Councils.

Therefore it is requested that the sign on the council chamber door be removed and replaced with "Only simple health liquids such as water and tonic are allowed in the chamber. Alcohol and such and food are not allowed."
